Use Case Notes

Use Case Note

Feb 20, 2021

■ Workflow

- *// Write down briefly how user perform the work*
- *The user will check and uncheck any categories listed within the filter system with respect to their preference*

■ Business Logic

- *// Write down what user expect the system to react upon certain condition (e.g. low inventory alert level)*
- *When the category of their choice is checked, results of that choice will automatically display on the app*

■ Decisions

- *// Write down the decisions made during the meeting (e.g. Must allow accessing from mobile devices)*
- *Must display all and any results picked by the user*

■ Follow -up

- *// Write down the items that should follow-up in the coming meeting*
- *Unsuccessful display of results from user's choice*

Scenarios

Scenario

1. Using the filter system successfully
 - 1.1. Navigate to the filter system displayed within the app
 - 1.2. Check any boxes that apply to your preference

- 1.3. Click apply at the bottom
- 1.4. The results should correlate with user input
- 1.5. Once results have loaded successfully, find what you want from the filtered results

Extensions

- 1.a. Using the filter system
 1. Navigate to the filter system displayed within the app
 2. Check any boxes that apply to your preference
 3. Click apply at the bottom
 4. Find what you want from the filtered results

Scenario2

1. If none of the matching results are to the user's liking
 - 1.1. Reset the filter system to its default display
 - 1.2. Try different categories within the system that may be to the user's preference
2. If there are no results anywhere to the user's liking
 - 2.1. Navigate to help located either at the bottom of the page
 - 2.2. Click help to find our emails for any questions or inquiries

Extensions

- 1.a. If none of the matching results are to the user's liking
 1. Reset the filter system to its default display
 2. Try different categories within the system that may be to the user's preference
- #.a. If there are no results anywhere to the user's liking
 1. Navigate to help located either at the bottom of the page
 2. Click help to find our emails for any questions or inquiries

Scenario3

1. Filter system failed to load preferences
 - 1.1. Attempt to reload page to reset the filter system
 - 1.2. Reset to the default display of the filter system
 - 1.3. Email us under "Help" for assistance with the system

Extensions

- 1.a. Filter system failed to load preferences
 1. Attempt to reload page to reset the filter system
 2. Reset to the default display of the filter system
 3. Email us under "Help" for assistance with the system

Details

Level	User
Complexity	Medium
Use Case Status	Initial
Implementation Status	Scheduled
Preconditions	User will be able to check any preferred categories listed weithin the app
Post-conditions	Filter system is fully functional and so that the algorithm does not give any categories that are not checked by the user
Author	N/A
Assumptions	N/A

■ Workflow

- *// Write down briefly how user perform the work*
- *User will perform their own research*
- *lead their own experience in fitness*
- *Document personal fitness diary*

■ Business Logic

- *// Write down what user expect the system to react upon certain condition (e.g. low inventory alert level)*
- *Informative results based off of user's body information input*

■ Decisions

- *// Write down the decisions made during the meeting (e.g. Must allow accessing from mobile devices)*
- *Must allow the user to freely control diet plan and body journal*

■ Follow -up

- *// Write down the items that should follow-up in the coming meeting*
- *Unsuccessful features*
- *Candidates for new features in the future*
- *Feature failing to function properly*

Scenarios

Scenario

1. Stay at Home Fitness
 - 1.1. Single section embedded within the filter system that is comprised of several categories related to its title
 - 1.2. Navigate to the filter system under the stay at home fitness section
 - 1.3. Check/Uncheck preferred categories
 - 1.4. Click "Apply"
 - 1.5. Choose from displayed results

Extensions

- 1.a. Stay at Home Fitness
 1. Single section embedded within the filter system that is comprised of several categories related to its title
 2. Navigate to the filter system under the stay at home fitness section
 3. Check/Uncheck preferred categories
 4. Click "Apply"
 5. Choose from displayed results

Scenario2

1. Using the weight tracker
 - 1.1. Navigate to the weight tracker located at the top of the page
 - 1.2. Enter the required body information
 - 1.3. Click "Enter"
 - 1.4. To change/update information, simply re-enter any information

Extensions

- 1.a. Using the weight tracker
 1. Navigate to the weight tracker located at the top of the page
 2. Enter the required body information
 3. Click "Enter"
 4. To change/update information, simply re-enter any information

Scenario3

1. Using the Personal Macro Generator (PMG)
 - 1.1. Navigate to the PMG located at the top of the page
 - 1.2. Enter all the required information and give the app a moment to display results

Extensions

- 1.a. Using the Personal Macro Generator (PMG)
 1. Navigate to the PMG located at the top of the page
 2. Enter all the required information and give the app a moment to display results

Scenario4

1. If feature does not work
 - 1.1. Reload the feature and try again

- 1.2. If trying again does not work, navigate to "Help" and send us an email for inquiries

Extensions

- 1.a. If feature does not work
 1. Reload the feature and try again
 2. If trying again does not work, navigate to "Help" and send us an email for inquiries

Use Case Note

Feb 19, 2021

■ Workflow

- *// Write down briefly how user perform the work*
- *User will register and remember registered information for login*

■ Business Logic

- *// Write down what user expect the system to react upon certain condition (e.g. low inventory alert level)*
- *Failed login or registration attempts*

■ Decisions

- *// Write down the decisions made during the meeting (e.g. Must allow accessing from mobile devices)*
- *Must allow the user to successfully login and register even after fail*

■ Follow-up

- *// Write down the items that should follow-up in the coming meeting*
- *Design of the login and registration forms*
- *Failed attempts to login or register*

Scenarios

Scenario

1. Registering for JZ Fitness
 - 1.1. Download the application
 - 1.2. Navigate to the registration form
 - 1.3. Enter all required information

- 1.4. Click register and continue to login
2. Login to JZ Fitness appFollow sequence of steps if login attempt fails
 - 2.1. Once at the login page, enter username and password specified in your registration form
 - 2.2. Login successfully and enjoy the app
 - 2.3. Re-enter username and password to ensure no faults were made during the attempt
 - 2.4. If login continues to fail, then click forgot my password to change password

Extensions

- 1.a. Registering for JZ Fitness
 1. Download the application
 2. Navigate to the registration form
 3. Enter all required information
 4. Click register and continue to login
- #.a. Login to JZ Fitness app
 1. Once at the login page, enter username and password specified in your registration form
 2. Login successfully and enjoy the app

Scenario2

1. Follow sequence of steps if login attempt fails
 - 1.1. Re-enter username and password to ensure no faults were made during the attempt
 - 1.2. If login continues to fail, then click forgot my password, an email will be sent to the user
 - 1.3. Check email & click change my password
 - 1.4. Will take you to an external link where user can change password and confirm new password

Scenario3

1. Changing existing account information for personal preference
 - 1.1. Navigate to profile located at the top right of the app
 - 1.2. Click account
 - 1.3. User can then personalize profile information and settings

Extensions

- 1.a. Changing existing account information for personal preference
 1. Navigate to profile located at the top right of the app
 2. Click account
 3. User can then personalize profile information and settings
